

Product Overview:

The LA-338 Tabletop Tripod provides a sturdy base for a device from a table top or other raised surface. The tabletop tripod features a mini ball head that mounts to virtually any device that accepts a 1/4"-20 thread. A single lever loosens the ball so that the device can move in any direction. The ball swivels and pans 360°, and a groove allows it to tilt 90° in one direction.

The Tabletop Tripod can support up to 5 lbs and only weighs 4.7 oz. Its maximum height is 3.8" and it folds to a length of 7.1" when not in use.

Highlights:

- Lightweight, Sturdy and Portable
- Swivels and Pans 360°
- Ball head tilts 90°
- 1/4"-20 threads fit most devices
- Quick and easy to setup

Includes: One (1) Tabletop Tripod
