32-in/32-out audio and control interface sends and receives digital audio and control signals via CobraNet.

- A single NHB32-C unit can support up to 32-channels of digital audio I/O, and one control signal I/O.
- Four separate 8-channel AES/EBU input/output terminals.
- CobraNet™ transfers high-quality 20-bit or 24-bit 48 kHz digital audio over four bundle paths in real time.
- MIDI, head amp remote (AD8HR, AD824) and amplifier control.
- NetworkAmp Manager software allows central control of both audio and control signals.
- Up to eight NHB32-C units can be networked, with each unit transferring and receiving four bundles, and 64 channels of digital audio can be received from any ACU16-C or NHB32-C on the network via CobraNet™.
- A networked system with ACU16-C and NHB32-C units is capable of handling up to 64 channels of digital audio.
- Multicast and unicast modes can be used in combination to optimize bandwidth.
